Rolitoansu

PROFILE

Final-year Software Engineering student passionate about collaborative environments and teamwork. Eager to continuously learn, tackle new challenges, and grow as a software development professional.

EDUCATION

B.Sc. in Software Engineering

University of Oviedo

Sep. 2022 - Jul. 2026

EXPERIENCE

Adobe Experience Manager (AEM) Developer

Hiberus

Jan. 2026 – Present

Backend Developer specialized in Adobe Experience Manager (AEM). Experienced in creating, maintaining, and optimizing digital platforms. Proficient in AEM architecture, covering both server-side logic and user interface. Skilled in designing scalable solutions by developing Java backend services and building dynamic, responsive frontend experiences for optimal performance and efficient content management.

PROJECTS

Wichat_en1b

Software Architecture

Developed a microservices-based web application emulating a trivia game. Utilized Docker, React, Express, and MongoDB. Implemented CI/CD pipelines with GitHub Actions, load testing with Gatling, and static code analysis with SonarQube.

IPS Project

Software Process Engineering

Developed a desktop application for gym chain management using Java Swing and WindowBuilder, following the Scrum Agile methodology.

Operating Systems Project

Operating Systems

Built a basic operating system in C, implementing process and memory management, system calls, vectors, and interrupt routines in a Linux environment.

Python--

Programming Language Design

Created a Python-inspired programming language, completing all compiler construction phases: lexical, syntactic, and semantic analysis, alongside code generation.

RELEVANT COURSEWORK

Computer Systems Security

- Reconnaissance, Exploitation, and Persistence techniques.
- Symmetric and asymmetric cryptography and encoding.
- Firewalls, Web Application Firewalls (WAFs), and Demilitarized Zones (DMZ).
- Security standards: ENS, ISO 27001.

Distributed Systems & Internet

- REST and SOAP APIs.
- Developed fleet management modules using Java (Spring Boot) and JavaScript (Node.js).

SKILLS & STRENGTHS

Java (Advanced)

Python (Advanced)

JavaScript (Intermediate)

C/C++ (Intermediate)

C# (Intermediate)

SQL (Intermediate)

Kotlin (Basic)

Git

GitHub Actions

Docker

Azure Cloud

Office 365
